

Saddle seats help you to maintain an upright posture when sitting. However, some people find the pommel, or middle ridge of the saddle, uncomfortable. The "Bettaback" Mushroom saddle stool addresses this issue by having a wide seat pan, that resembles a mushroom cap, designed for comfort.

The Mushroom saddle stool provides the main postural advantages of a saddle seat in a simplified, inexpensive form. The seat pan is height adjustable only.

The saddle itself is quite round, unobtrusive and reasonably soft.

Supplied with a chrome gas lift and a raked alloy star base.

Suitable for healthcare, dentist, lab or salon applications.

- Chrome 5 star base
- Chrome gas lift
- Seat height adjustable (only)
- Weight capacity: 120 kg
